

# Introducing Our New

## ASHRAE BACnet™ /IP Relay

The **RIBTW2421B-BCIP** is a BACnet/IP Relay that offers one Binary Input and one Binary Output. The 20 Amp rated relay can be used to control a load, while the Dry Contact input can be used to provide feedback status if connected to a current sensor. The NEMA1 plastic enclosure has several LEDs for local monitoring and status.

### FEATURES:

- UL Listed to UL916 – Energy Management Equipment
- One Binary Input and one Binary output  
20 Amp relay as Binary Output 1  
Class 2 Dry Contact input as Binary Input 1
- Wide range of power options:  
24 Vac/dc and 120-277 Vac
- Can be configured via webpage

### BENEFITS:

- Ubiquitous connection type creates a user-friendly setup and reduces installation costs
- Seamless scalability creates cost-effective network expansion without the need for new controller hardware
- Easily troubleshoot maintenance issues with a local relay override or utilize the local reset button to restore to default settings
- Design and Assembled in the USA and 100% product testing before leaving the factory
- 5-year warranty
